

HIGH SCHOOL ACTIVITIES

Do your students need inspiration, want to get their hands dirty or don some high vis gear? Earth Carers can share the message of waste minimisation and sustainability through a variety of hands on experiences for your students.

Earth Carers Course

Earth Carers coordinate a tailor made course for high school students. The course runs for four to five sessions and can include a bin audit, composting/worm farming, movie screenings, make your own beeswax sandwich wrap and DIY lip balm! Students have weekly challenges in between sessions like op shopping or cooking a plastic free meal. We can run the course during or after school. One student said *'Thank you so much for this great experience and opening our eyes to the issue of waste. I have thoroughly enjoyed it.'*

PLC students making bliss balls for their waste free lunchbox

After the course students can volunteer with Earth Carers at the Royal Show and other community events.

Sustainable Screenings

Earth Carers can visit your school to screen some inspirational sustainable movies with guest speakers and prizes!

Cleanups and Surveys

Turn your students into citizen scientists! Earth Carers can lead class groups in river and beach clean-ups. We use Tangaroa Blue's methodology to sort and survey the litter then students then feed the data collected into the Australian Marine Debris Database (see www.tangaroablue.org).

Students surveying a beach for plastic pollution

Battery recycling

Your school can join our battery recycling program! We will provide you with a bin and recycle your old household batteries to keep batteries out of landfill! See our School Battery Recycling factsheet or our website for more info.

Support for your project!

If your class has a particular project you want to pursue we may be able to help. Some project ideas include: clothes swap parties, recycled fashion parades, library displays, improving recycling facilities at school, visiting waste facilities, setting up composting facilities... There are limitless ways we can support your schools waste free initiatives!

All Earth Carers activities are **FREE** to schools in the Town of Cottesloe, Town of Claremont, Town of Mosman Park, Shire of Peppermint Grove and City of Subiaco.
