

H₂O TO GO

The WMRC Waste Education Team have just the thing to decrease the waste from your next event! Our **H₂O to Go** portable water bottle refill stations and a water fountain are available to borrow for organisations hosting community events within the WMRC region. All you need is a tap. The stations provide free filtered water at your events, reduce litter and encourage people to bring reusable water bottles when they are out and about.

Case study:

2015 Perth Royal Show

The H₂O to Go stations were at the Perth Royal Show in 2015 as part of the WA To Good To Waste stand. They dispensed a total of 2,106 litres of free filtered water during the week. That equates to 3,510 600ml water bottles that weren't bought.

Given that bottled water was being sold at \$4 per bottle that's a saving of \$14,040!

How do they work?

Packed in a handy carry bag, the stations are easily transported by car and simple to set up. They have a base plate which can be pegged or sand bagged down on windy days and connect to an existing mains water tap via a 10m stainless steel drink safe hose. The tap must have a thread to connect the hose to and cannot be self-closing. Carbon filters purify the water and inbuilt flow meters help you track how many plastic water bottles you've saved! You can borrow one, two or three of the stations.

The stations weigh 12kgs plus the metal base plate and are easiest to transport using a sack trolley. Allow half an hour to set up before the event.

Who can borrow them?

H₂O to Go stations are free to borrow for organisations hosting community events within the WMRC region (Claremont, Cottesloe, Mosman Park, Peppermint Grove and Subiaco councils).

To borrow the stations you need to:

- ◆ Feature them in the event promotion (posters, websites etc) using our media template, examples of graphics below
- ◆ Announce them at the event (where possible)
- ◆ Organise transportation of the stations and allow half an hour on pick up to run through how to use them
- ◆ Send us some photos of your event (please)
- ◆ Sign our terms for use

Checklist

H₂O to Go includes:

- ◆ Three units (two refill stations measuring 1200 x 900 x 500mm and one water fountain measuring 800 x 450 x 500mm)
- ◆ Red drain hose and blue drink safe hose
- ◆ Red joiner hose and blue joiner hose
- ◆ Base plate and base plate bolt
- ◆ Tap connection and joiner
- ◆ Hose covers
- ◆ Padded carry bag
- ◆ Full assembly instructions

To borrow **H₂O to Go** contact WMRC Waste Education team on 9384 4003 or email: earthcarers@wmrc.wa.gov.au who will assess if they are appropriate for your event.

The H₂O to Go project is funded by Keep Australia Beautiful's Community Litter Grant and supported by Meet Pat.
